

## **1. Malaria Task Force**

A small village in Kenya has lost 50 children over the last year to Malaria – put together a plan as a local care worker to educate the village about prevention. What resources might you need keeping in mind most people are so poor they are unable to read or write?

## **2. Malaria Task Force**

London has a large population of Africans who regularly return home for family gatherings – last year three people died of Malaria – as a local care worker what advice can you give them about preventing malaria.

## **3. Malaria Task Force**

You are part of the Global Task force for the eradication of Malaria – you need to come up with five points to share at the WHO Malaria conference on how the task force can monitor and help prevent malaria on a global scale.
